About Me

I am Fajar Arief Budiman, a passionate, healthy and disciplined person. Have the ability to adapt quickly to the existing environment. As an individual who has the ability to work in a team, I am very enthusiastic to contribute and grow with this company. I have worked on one frontend project and currently I am developing skills in the area of backend development. This experience made me even more interested in continuing to learn and innovate in the world of technology.

Experience

Freelance Software Developer   Januari 2024 - Current

- Gunita (Herbal Plant Mobile App, Desa Gunaksa Bali) – Worked as a Fullstack Developer (Flutter for frontend, Go with MySQL for backend) in collaboration with Udayana University students and the local government to build a mobile application for promoting and managing traditional herbal plants.
- Dokterhub (ERP System for Clinics, PT Gerin Mitra Husada Jakarta) – Contributed as a Fullstack Developer using Laravel and Bootstrap 5. Implemented key features including real-time chat, PDF generation, CRUD operations, and other supporting modules for clinic operations.
- Hemoku & M-Diabetic Care (Health Screening Apps) – Served as a Backend Developer (Laravel) in collaboration with lecturers from Stikes Widya Dharma Husada. Built secure REST APIs, implemented data validation, and developed backend logic to support anemia and diabetes screening mobile applications.
